

Forecast and Reforecast With More Control

Forecasting and Reforecasting with True Sky

Particularly in a turbulent economy, what you do with your business can have a huge impact on your future. Whether your industry has slowed down or you're one of the lucky ones who just can't keep up with demand, the time to plan is now. The finance and accounting teams must act quickly: developing models, scenarios, and managing the performance of the business in the short, medium and long term are critical.

True Sky can give you the agility and power to reforecast and adjust for turbulent times.

Solution Highlights

- Integrate with source data from your ERP and/or other data sources
- Quickly create multiple budgets and forecasts that can be compared and reviewed side-by-side
- Seed your next forecast version from prior budgets and forecasts
- Use automated tools for spreading and adjustments
- Conduct rolling forecasts with ease
- Generate dashboards and other visualization tools

Take Control of Your Budgeting Process with True Sky

- Reduce the time and effort your budget contributors spend on the process
- Minimize administrative effort while increasing quality
- Provide decision makers with meaningful information so you can reduce risks and avoid surprises
